Art Unit: 2883

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a system for joining two optical fibers along common axis by fusion splicing classified in class 385, subclass 96.
- II. Claims 31-43, drawn to a method for joining two optical fibers along a common axis including the steps of removing coatings present thereon and cleaving the ends of the fibers in said holding means; and fusing said fibers by electric arc welding classified in class 385, subclass 116.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case Invention Group I can be practiced for shaping an optical fiber end to produce a pigtailed fiber-lens rather than for joining two optical fibers as claimed in invention II and/or invention 1 can be practiced using different steps than that of invention II, such as the step of arranging the optical fiber(s) in holding means prior to the step of removing the coating means.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Buff on 9/14/05 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-30. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-44

Art Unit: 2883

are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ernest Buff on 10/05/2005, in order to facilitate allowing the case by including an allowable subject matter into the independent claim 1, amending claim 7 containing allowed subject matter, and finally canceling the non-elected claims 31-43.

Please cancel claims 31-43

In claim 1, line 14, immediately after 'non-coincidental;' please insert light from a first source traverses a first optical path and light from a second source traverses a second optical path, each of said paths being multiply folded;

In claim 7, line 2, please delete [a) light from said first source traverses a first optical path and light from a second source traverses a second optical path, each of said paths being multiply folded;]

In claim 7, line 5, please delete [b] and instead insert a

In claim 7, line 7, please delete [c] and instead insert b

Reason for Allowance

Claims 1-30 are allowed for the following reasons:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. Oki et al. (US 20020159724).

Claim 1 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious light from a first source traverses a first optical path and light from a second source traverses a second optical path, *each of said paths being multiply folded* in combination with the rest of the limitations of the base claim. Claims 2-30 depend on claim 1 and therefore they are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany

Art Unit: 2883

the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Relevant Prior Art

Prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In accordance with MPEP 707.05 the following references are pertinent in rejection of this application since they provide substantially the same information disclosure as this patent does.
